November 7th, 2010

To Whom it May Concern:

This letter is for the purpose of recommending Systems West, Inc. as your contractor of choice for your commercial building needs.

In 2010 we expanded our operation and built a new 80'x120' Butler steel building. We were very happy with the performance of Systems West through the entirety of the project. From the early design and sale of the project through construction they were always very responsive, paid close attention to detail, and met their promises.

As our Project Manager, Eric was very organized and knowledgeable about construction. He was able to make sure every phase of the project was completed on time and within our budget.

I would not hesitate to work with Systems West again in the future. Feel free to contact me with any further questions.

Sincerely,

A handwritten signature in cursive script that reads "Dan Thielen".
